

Cover Letter

Dear Sir/Madam,

I am writing this cover letter to inquire about the opening for Software Developer. Currently I am pursuing my Master's in Computer science, WSU (Expected Completion May 2019). I have completed my Bachelor's in Computer Engineering from University of Mumbai, India.

I have more than three years of experience in developing full stack web applications using various JAVA technologies like JSP- Servlet, Spring. I have a good knowledge of Core Java, Collections framework and Multithreading and I am an Oracle Certified Professional, in Java Programming. I have extensively used frontend technology like AngularJS and JavaScript. High self-motivation and curiosity drives me to ensure delivery of production grade solutions. Have been part of 3 projects which are currently in production. I worked in agile-driven environment with incessant client interaction.

The attached resume highlights my career profile and my significant accomplishments which put me in alignment with the position.

I realize that this position requires skills like programming, problem solving ability, communication and experience. I would love to say that I possess all these skills. I welcome the opportunity to speak with you if you feel I would be a strong candidate for this or any position in your organization.

Regards,

Bhavesh Mahendra Sanghvi
